EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Farber on 03 November 2003.

The application has been amended as follows:

The amendment filed of 9/4/03 inadvertently failed to correct a grammatical error; therefore, in claim 2, line 5, "diaphragm" has been changed to --diaphragms--. The paragraph to which this change was made reads as follows:

2. (currently amended) The device as claimed in claim 1, wherein there is a said optical receiver (9, 10, 11, 12, 13, 14) for each position of the selector lever (1) to be determined, and an opening (5, 6, 7) in an individual one of the diaphragms (2, 3) is moved over the optical receivers (9, 10, 11, 12, 13, 14) when the selector lever (1) is moved.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose, either singly or in combination, a device for detecting the position of a selector lever, in which the selector lever is connected to a device that emits a signal to an evaluation device in a desired position of the selector lever, wherein the selector lever is connected to a first diaphragm and to a second diaphragm, the first and second diaphragms being arranged in a beam path between an optical transmitter being arranged in a beam path between an optical transmitter and an optical receiver, wherein there is a mechanical connection between the selector lever and the first diaphragm providing for movement of the first diaphragm in response to movement of the selector lever along a first coordinate direction, the mechanical connection providing for movement of the second diaphragm upon movement of the selector lever in a second coordinate direction, an individual one of the diaphragms, which follows movement of the selector lever, being optically transparent in the desired position of the selector lever, as a result of which the optical receiver receives the signal from the optical transmitter and transmits it to the evaluation device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephone B. Allen whose telephone number is (703) 308-4828. The examiner can normally be reached on Mon-Thurs from 0900-1700.
